

CREA DECO   
CREATIVE / INNOVATION / SOLUTION

**CREATURA COMMERCE**  
PT. CREATURA DEKORASI INDONESIA

Member of Creatura Group

PT CREATURA DEKORASI INDONESIA, previously known as Creatura Decorations, was founded in year 2013, with business focus in importing and distributing creative and innovative interior and furnishing products for Interior and furniture industries.

Our main products are premium high gloss acrylic product from two well known global players , EGR Australia and Sewon from South Korea.

Our newest products are PVC Foam Board from one of the largest manufacture from China and marble acrylic product from Indonesia.

From year 2019, we changed our brand to Creatura Commerce to broaden our business vision and in year 2020 we reintroduce our products as CreaDeco.

We offer solutions rather than products. We establish partnership with our customers and suppliers to build long term mutual relationships through times.

Creatura Commerce,

*Your Truly Business Partner*

# CREAgloss

## DESCRIPTION

CREAgloss panels are the premier choice for creating stunning, modern interior spaces. With a superior appearance compared to laminates, two-pack or vinyl panels, CREAgloss is the premium solution for cabinet makers, builders, architects and discerning homeowners seeking luxurious, high-gloss cabinetry.

## APPLICATIONS

CREAgloss can be laminated to a wide variety of substrates for many different applications:

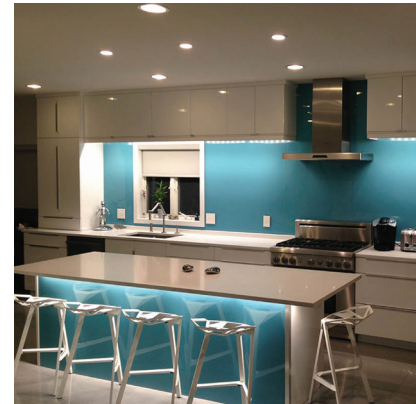

- Kitchen cabinets and doors
- Office furniture and partitions
- Wall cladding
- Occasional furniture and cabinets

## FEATURES

- High gloss acrylic cap over colored ABS
- Good chemical resistance
- No special equipment for machining and matching edge bands available
- High UV and heat resistance

## CREAglass / CREAglass+

### DESCRIPTION

CREAglass is a range of next-generation high gloss wall panels. Vivid, lightweight and stronger than glass, it's a sophisticated solution that improves any room. Designed and manufactured in Australia, Zenolite is suitable for both residential and commercial applications

### APPLICATIONS

CREAglass can be laminated to a wide variety of substrates for many different applications:

- Kitchen cabinets and doors
- Office furniture and partitions
- Wall cladding
- Occasional furniture and cabinets
- Bathroom (hard coat version)

### FEATURES

- A vibrant colour layer is capped with a stunningly clear top layer to create a panel of incredible depth, gloss, and clarity
- Lightweight and easy to handle
- Can be installed rapidly over new or existing wall finishes
- Comes in a range of convenient panel sizes

## DESCRIPTION

CREAcrysal is an award winning high gloss acrylic wall panel. CREAcrysal is a replacement to tiles and looks like back painted glass. With a special hard coated top layer for extra scratch and chemical resistance, cleaning and maintaining your CREAcrysal is nearly effortless

## APPLICATIONS

CREAcrysal can be laminated to a wide variety of substrates for many different applications:

- Bathrooms
- Shower walls
- Kitchen splashbacks

## FEATURES

- Brilliant mirror reflection high gloss finish
- Installs 3× faster than tiles
- Half price of installing glass walls
- Effortless to clean, thanks to its advanced scratch resistant hard coating
- Can be cut and drilled with normal power tools (circular saws, jigsaws, planers)
- Half the weight of glass, but 25× stronger, making handling and installation easy
- Adheres straight over existing tiles or waterproof board
- Fantastic for hygiene

# CREAcrysal

## CREAmarble

### DESCRIPTION

CREAmarble is a model of marble, granite and onyx. Suitable for use in public places, hotels, offices, shops, hospitals, and residential

### APPLICATIONS

CREAmarble can be laminated to a wide variety of substrates for many different applications:

- Interior decoration
- Countertop
- Wall
- Kitchen
- Bathroom, etc

### FEATURES

- Heat and water resistant
- Anti acid, alkali
- Anti-corrosion
- Can be curved
- Heat and acoustic insulation
- Light and hard
- Easily sent and stored
- Scratch resistant
- Economical
- Easy to install

## DESCRIPTION

CREAboard is a lightweight, rigid PVC sheet, used for a variety of applications. A variety of applications including signs and displays, exhibit booths, photo mounting ect. Lightweight, stiffness and durability. It is feasible to engrave, emboss, paint, print, laminate and mill the surface of the foam board according to your requirements. One of the most highlighting features of this foam board is that they will not decay with time and the color remains in the same new look for a long time without fading

---

## APPLICATIONS

CREAboard can be laminated to a wide variety of substrates for many different applications:

- Advertising
  - Sign
  - Furniture cabinet
  - Decoration, etc.
- 

## FEATURES

- Waterproofing
- Fire retardant and self-extinguishing
- Heat preservation
- Sound-insulated
- Insulation
- Non-corrosion
- Non-toxic
- Tough, rigid with the high impact strength
- Stable color retention
- Dampproof
- Anti - deformed

CREAboard

# Machining Guide

## ROUTERING

Router cutting is the preferred method for cutting a StyleLite panel. Router cut using a feed rate of 10 to 15 metres per minute with a spindle speed of 20,000rpm.

Solid carbide router cutters will deliver the best finish. Twin flute compression cutters are ideal as they minimise the chance of chipping at the edge and eliminate any feathering of the masking material on either side of the sheet.

## SAW CUTTING

Use very sharp carbide tipped blades with 3 to 5 teeth per centimetre. We recommend using a 300mm diameter blade at a speed of 3200rpm for best results. Results may vary depending on your equipment.

## BAND SAW

Band saws can be used to cut curves however a secondary finishing operation will be required.

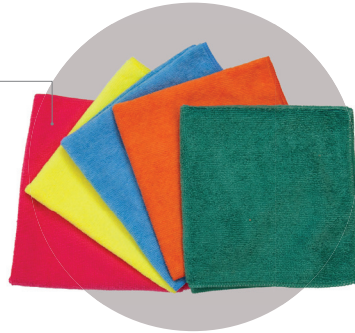

## DRILLING

- Drilling can be done using high speed steel or carbide tipped drills.
- Best results will be achieved using drills with a tip angle of 110 to 130°.
- Use slow to medium speeds to avoid overheating the material.

## Cleaning Do's and Don'ts

CreaGloss and CreaGlass products can be cleaned simply using a wet microfibre cloth or chamois

- ✓ Clean wet microfibre cloth
- ✓ Clean wet chamois
- ✓ Vuplex used often
- ✓ Non abrasive soap and detergent
- ✓ Warm water

- ✗ Paper towel
- ✗ Dry wipe at any time
- ✗ Brushes, scourers or scrapers
- ✗ Abrasive cleaners
- ✗ Thinners or Methylated Spirits

## General Cleaning

Apply Vuplex, or warm soapy water and wipe using a clean microfibre, soft cloth or damp chamois.
